FINAL EXAMINATION

TRIMESTER 2, 2016/2017

BFN1024 – PRINCIPLES OF FINANCE

(All sections / Groups)

24TH FEBRUARY 2017
3.00 p.m – 5.00 p.m
(2 Hours)

INSTRUCTIONS TO STUDENTS

1. This Questions paper consists of ten (10) pages with 2 sections *excluding* the cover page.

2. **Section A –15 Multiple Choice Questions (30 marks)**
   Instruction: **Answer ALL questions**. Shade your answer in the OMR sheet provided.

3. **Section B – 4 Working Problems (70 Marks)**
   Instruction: **Answer ALL questions**. Write your answers in the Answer Booklet provided.

SECTION A

Section A: 15 Multiple Choice Questions (30 marks)

1. The Profitability Index rule is most useful
   a. When managers desire to solve the scale problem
   b. When the IRR and the NPV give contradicting investment decisions
   c. When managers face capital rationing
   d. To determine optimal payback periods

2. Which of the following actions are likely to reduce the length of a company's cash conversion cycle?
   a. Adopting a new inventory system that reduces the inventory conversion period.
   b. Reducing the average days sales outstanding (DSO) on its accounts receivable.
   c. Reducing the amount of time the company takes to pay its suppliers.
   d. Statements a and b are correct

3. Capital budgeting is the process
   a. used in sell or process further decisions.
   b. of determining how much capital stock to issue.
   c. of eliminating unprofitable product lines.
   d. of making capital expenditure decisions.

4. A capital budgeting method that takes into consideration the time value of money is the
   a. annual rate of return method.
   b. return on stockholders' equity method.
   c. internal rate of return method.
   d. cash payback technique.

5. If a payback period for a project is greater than its expected useful life, the
   a. project will always be profitable.
   b. entire initial investment will not be recovered.
   c. project would only be acceptable if the company's cost of capital was low.
   d. project's return will always exceed the company's cost of capital.

Continued...

6. A project has the following cash flows. What is the payback period?

Year	Cash Flow
0	-RM46,000
1	13,500
2	22,900
3	8,400
4	5,600

a. 2.48 years
b. 2.59 years
c. 2.96 years
d. 3.21 years

7. The goal of working capital management is to
   a. balance current assets against current liabilities.
   b. pay off short-term debts.
   c. achieve a balance between risk and return in order to maximize the firm's value.
   d. achieve a balance between short-term and long-term assets so that they add to the achievement of the firm's overall goals.

8. Which of the following might be attributed to efficient inventory management?
   a. High inventory turnover ratio.
   b. Low incidence of production schedule disruptions.
   c. High total assets turnover.
   d. All of the statements above are correct.

9. A firm would accept a project with a net present value of zero because
   a. the project would maintain the wealth of the firm's owners.
   b. the project would enhance the wealth of the firm's owners.
   c. the return on the project would be positive.
   d. the return on the project would be zero.

10. The purpose of managing current assets and current liabilities is to
    a. achieve as low a level of current assets as possible.
    b. achieve as low a level of current liabilities as possible.
    c. achieve a balance between profitability and risk that contributes to the firm's value.
    d. achieve as high a level of current liabilities as possible.

Continued...

11. The _____ of a firm is the amount of time that elapses from the point when the firm makes an outlay to purchase raw materials to the point when cash is collected from the sale of the finished good.
    a. cash turnover.
    b. cash conversion cycle.
    c. average age of inventory.
    d. average collection period.

12. _____ projects have the same function; the acceptance of one _____ the others from consideration.
    a. Capital; eliminates
    b. Independent; does not eliminate
    c. Mutually exclusive; eliminates
    d. Replacements; does not eliminate

13. A firm with unlimited funds must evaluate five projects. Projects 1 and 2 are independent and Projects 3, 4, and 5 are mutually exclusive. The projects are listed with their returns

Project	Status	Return (%)
1	Independent	14
2	Independent	12
3	Mutually Exclusive	10
4	Mutually Exclusive	15
5	Mutually Exclusive	12

A ranking of the projects on the basis of their returns from the best to the worst according to their acceptability to the firm would be
    a. 4,1,2 or 5 and 3
    b. 4,1 and 2
    c. 3,2 or 5,1 and 4
    d. 4,1,5 and 3

Continued...

14. Net present value is preferred to internal rate of return for capital budgeting decisions because
    a. The internal rate of return does not allow you to determine if the project is acceptable.
    b. The net present value is the only method that allows you to determine which independent project is acceptable.
    c. The net present value allows you to compare mutually exclusive projects.
    d. The internal rate of return for a project is different for each firm.

15. Which of the following statements is CORRECT?

    a. The internal rate of return method (IRR) is generally regarded by academics as being the best single method for evaluating capital budgeting projects.
    b. The payback method is generally regarded by academics as being the best single method for evaluating capital budgeting projects.
    c. The net present value method (NPV) is generally regarded by academics as being the best single method for evaluating capital budgeting projects.
    d. The modified internal rate of return method (MIRR) is generally regarded by academics as being the best single method for evaluating capital budgeting projects.

Section B: Working Problems (70 marks)

Answer ALL Questions

Question 1

A firm has determined its optimal capital structure which is composed of the following sources and target market value proportions.

Source of Capital	Target Market Proportions
Long-term debt	25%
Preferred stock	15%
Common stock equity	60%

Debt: The firm can sell a 12-year, RM1,000 par value, 7 percent bond for RM960.
Preferred Stock: The firm has determined it can issue preferred stock at RM75 per share par value. The stock will pay a RM10 annual dividend.
Common Stock: A firm's common stock is currently selling for RM18 per share. The firm just paid a dividend of RM1.74. Its dividend payments have been growing at a constant rate of 3.78% per year.

Continued...

If the firm's marginal tax rate is 40 percent,

i. Using either the approximation method or financial calculator, calculate the firm's after-tax cost of debt.

(5 marks)

ii. Calculate the firm's cost of preferred stock.

(5 marks)

iii. Calculate the firm's cost of a new issue of common stock assuming floatation cost is due to underpricing of RM1.

(5 marks)

iv. Calculate the firm's weighted average cost of capital up to the point when retained earnings are exhausted.

(5 marks)
(TOTAL: 20 MARKS)

Question 2

Consider the following information of Stock Acacia and Allium.

State (i)	Acacia		Allium	
	Probability (P_{ri})	Return (r_i)	Probability (P_{ri})	Return (r_i)
1	0.10	40%	0.40	35%
2	0.20	10%	0.30	10%
3	0.40	0	0.30	-20%
4	0.20	-5%		
5	0.10	-10%		

a) Calculate the expected return for each asset. Which provides the largest expected return?

(7 marks)

b) Calculate the standard deviation for each asset returns. Which appear to have a greatest risk?

(8 marks)
(TOTAL: 15 MARKS)

Continued...

Question 3

a) Jemari Sdn Bhd intends to invest RM100,000 for a new project. The estimated after tax cash flows are as follows:

Year	Cash Flows (RM)
0	-100,000
1	50,000
2	20,000
3	32,000
4	15,000
5	16,000

Calculate the payback period for the project. Should the project be accepted if the acceptable payback period is 3 years? Explain.

(4 marks)

b) Given two capital projects, Riang and Ceria. Each project has an initial outlay of RM200,000 and cost of capital of 12%. The expected net cash flows of the projects are as follows:

Year	Project Riang (RM)	Project Ceria(RM)
1	150,000	80,000
2	70,000	80,000
3	70,000	80,000
4	30,000	80,000

Required:

i. Calculate the net present value for each project.

(8 marks)

ii. Based on your answer in (i) above, which project should be accepted if projects are mutually exclusive? Explain

(3 marks)
(TOTAL: 15 MARKS)

Question 4

a) Kaki Pancing Products is analyzing the performance of its cash management. On average, the firm holds inventory 65 days, pays its suppliers in 35 days, and collects its receivables in 15 days. The firm has a current annual outlay of RM1,960,000 on operating cycle investments. Kaki Pancing currently pays 10 percent for its negotiated financing (assume a 365 day year.)

Continued...

i. Calculate the firm's cash conversion cycle.

(5 marks)

ii. Calculate the firm's operating cycle.

(5 marks)

b) Calculate the value of each investment opportunity below

i. Topaz Berhad has issued bonds with a par value of RM1,000 and a maturity periods of ten years. The yearly coupon rate offered is 7%. Rating Agency Malaysia (RAM) has given a rating of BBB to the bond of Topaz Berhad. If the required rate of return is 15%, what is the market value for the said bonds?

(5 marks)

ii. Ordinary shares of Red Ruby Berhad that are sold at the price of RM17.80 had just paid dividends for RM0.95. The dividends are expected to grow by 5% a year at a constant rate. If the investors require a return of 10% on this stock, what is the current price?

(5 marks)
(TOTAL: 20 MARKS)

BFN1024 FINANCIAL MANAGEMENT
Selected Formulas

1. $NPV = \sum_{t=0}^{n} \frac{CF_t}{(1+r)^t} - \text{Co}$

2. $\text{E (R)} = \sum_{i=1}^{n} r_i \, P_i$

3. $\sigma^2 = \sum_{j=1}^{n} \left(r_j - \bar{r}\right)^2 \times P_{r_j}$

4. $WACC = (w_i \, r_i) + \left(w_p \, r_p\right) + (w_s \, r_s)$

5. $r_d = \frac{I + \frac{\$1000 - N_d}{n}}{\frac{N_d + \$1000}{2}}$

6. $r_{d \text{ after tax}} = r_d \, (1\text{-T})$

7. $r_s = R_F + [b \times (r_m - R_F)]$

8. $OC = AAI + ACP$

9. $CCC = OC - APP$

10. $EOQ = \sqrt{\frac{2 \, X \, S \, X \, O}{C}}$
